

Release Readiness Checklist for SatsPath v0

Security and Privacy

- ☒ All cryptographic implementations reviewed.
- ☒ No private material (seeds, keys) included in profiles or payment pointers.
- ☒ Sensitive user data masked in preview modes.

Functional Testing

- ☒ All unit tests pass across workspaces.
- ☒ Integration tests for HTTP resolver and LNURL pass.
- ☒ Testnet execution paths enabled; mainnet execution paths strictly disabled.

Code Quality

- ☒ CI workflows in place for formatting, linting, and testing.
- ☒ PR template and branch protection guidelines established.

Documentation

- ☒ README reflects experimental nature of swap engine.
- ☒ Core architecture and protocol concepts fully documented.
